#### **PRESENTATION: BEVERLY HILLS TREE PLANTING PLAN**

Jackson Goldklang of Perennial Gold, LLC presented a proposal to plant 24 native trees in Beverly Park to support forest restoration in canopy gaps and open areas. He noted severe historical loss of native habitat in Southeast Michigan and identified deer pressure and altered soil conditions as key barriers to natural regeneration. Goldklang gave an overview of the plan using locally sourced species for use in the project. Board members and Goldklang discussed seedling size, community engagement, potential school partnerships and tree tubes.

Motion by Ross, second by Kreit, to recommend Village Council accept the proposal from Perennial Gold, LLC for planting small trees in canopy gaps at Beverly Park, with a budget not to exceed \$2,530.

Motion passed.

Borgon arrived at the meeting at 8:12 p.m.

**PRESENTATION: WENDBROOK PARK (SMITHGROUP)**

Bob Doyle and John Quinn of the SmithGroup presented preliminary findings for the Wendbrook Park master planning process, including site analysis, building assessment, and initial programming concepts and identified the site's natural features, including Rouge River frontage, open lawn areas, wooded spaces, and floodplain, as key assets. Planning considerations include compatibility with neighboring residences, site circulation, parking needs, and the future of the existing cul-de-sac. Doyle described the existing house as structurally sound but in need of substantial rehabilitation. Doyle presented a nature-focused vision centered on walking, gathering, learning, and experiencing the environment. Potential uses discussed included nature trails, ecological education, habitat restoration, wildlife observation, small community gatherings, and river access. The Board, SmithGroup and the public discussed potential uses and programming for the site. Community feedback emphasized preserving the site's quiet, natural character and avoiding active recreation such as sports fields or courts. There was strong alignment that the park should remain passive and nature-oriented. Discussion also included Rouge River interpretation and ecological education, partnerships with environmental organizations, pedestrian connectivity, establishing a nature preserve identity and potential adaptive use options for the house.
